## What is Fortune Pai Gow?

Pai Gow is played with a standard 52-card deck with one joker added, making 53. Joker may only be used as an ace or to make Straights and Flushes. Each player is dealt seven down cards from which they form two hands, a front two-card and a back five-card hand. The back five-card hand must be of a higher ranking than the front two-card hand. Traditional poker rankings are used to determine winners. When players' hands are compared to the Designated Player/Dealer's hands, both hands must be of higher ranking to win. If both are of the same or of lower ranking, the Designated Player/Dealer wins. If one hand is lower and one higher, it is a push and neither wins.

## Betting Scheme

Players may place wagers bearing in mind the posted table minimum and maximum. Players must make a standard Pai Gow Poker wager and will then have the option to make a Fortune Bonus wager as well. If a player wagers at least \$5 on the Fortune Bonus, the player qualifies for the Envy Bonus and the Casino dealer must place an Envy button next to the wager. The player/dealer may place a wager to cover some or all of the action on the table.

## Round of Play

Each player and the player/dealer put up any bets they wish to place for the next hand. Players have the option of placing a Fortune Bonus bet at this time. Play rotates clockwise. Each player has the option:

1. To be the Designated Player / Dealer for two consecutive hands, or
2. For only one hand, then pass that privilege, or
3. Refuse the option entirely, in which case it is offered to the next player.

As in many other games, several players may wager on the same hand, frequently called backline betting.

The automatic shuffler supplies seven piles of seven cards each. The random number generator determines which seat receives the first pile of seven cards and the remaining six piles are distributed in order to the remained or the seats in a clockwise manner.

Cards distributed to seats without a wager are collected by the dealer.

Players form two hands, a two-card and a five-card hand.

## Round of Play

When all players' hands have been set, the dealer exposes the Designated Player/Dealer's hand and sets it according to the Designated Player / Dealer's instruction. Each player's hand is compared to the Designated Player/Dealer's hand to determine the winner according to the criteria in the above paragraphs.

Bets are collected and paid only to the extent the Designated Player/Dealer's money is in action.

- Once the standard Pai Gow Poker wagers are settled (win, lose, tie/push) the Cardroom dealer will determine if they player's hand qualifies for the Fortune Bonus and/or the Envy Bonus.
- The Fortune Bonus bet considers the best hand possible among the player's seven cards.
- If the player's hand qualifies for payouts, the player is paid according to the posted pay table.
  - The dealer leaves the Envy button, if applicable, next to the player's original wager and payouts. The dealer will not pick up envy buttons until all wagers are reconciled.
