"Crap, Eleven, Any Seven" ^{→ say it on every come out roll.}

"Hardways working unless called off"

*New shooter:

"New shooter is coming out, bet crap, eleven or any seven, bet it now when the dice are in the center. Are all bets down?"

*Don't say "prop bet" say actual bet

*Remind players of repeat bet always

*When announcing ^{prop} payout say "And you're still up the same way."

"Point is $\frac{10}{\uparrow}$ place the $\frac{4}{\rightarrow}$ opposite"

* A line to sell hardways

"Lots of room on the hardways"

* If you don't understand a bet and
the dice are in the air say
"No Action this roll."

The General Duties of a Stick

- The stick does not wait for dealers to count out change.
 - You must call the dice before touching them w/ the stick.
 - Watch the end opposite of the shooter.
 - Stick will announce all bets
exp. "\$1.00 Eleven"
 - Amount of money
 - what the bet is (prop, hardway, ect)
 - Action #1: Call dice + Bake in center
 - Action #2: watch your end
 - Action #3: Pick up all losing prop/ect bets
 - Action #4: Pay winning bets
 - Action #5: Put up new bets
 - Action #6: Give dice to shooter
 - Do not hustle the hardways on the come out roll, just the one roll bets.
(Exception - if a player is betting it every time)
- 

- After the point is established
do not hustle one roll bets

- Hustle all hardways when the
point is 5 or 9

- Only the shooter can ask for
"same dice". We do not
listen to the other players.

The Base

The Do's + Don'ts of Base

- When announcing a prop bet say how much it is, what it is and players position.

Exp. #2 CE 2 from me

- Do not (obviously) look at the dice when they are thrown on the other side.

* dealer tip: Take a quick glance if needed.

- Don't lean when paying - It obstructs the boxman's view (game security)

- A heeled bet is not in action 

- a non-heeled bet is in action

* Dealer must train himself to look in the direction of the Big 6+8

Procedure Situations

A player has 75# (one green + 10 red)
and you want to convert the
red to green and then pay.

1) Prove the \$50 $\begin{array}{|c|c|} \hline R & R \\ \hline 25 & 25 \\ \hline \end{array}$

2) Pay with green $\begin{array}{|c|c|c|} \hline R & R & G \\ \hline 25 & 25 & 50 \\ \hline \end{array}$

3) Pick up the red $\begin{array}{|c|} \hline G \\ \hline 50 \\ \hline \end{array}$

4) Pay the green $\begin{array}{|c|c|} \hline G & G \\ \hline 50 & 50 \\ \hline \end{array}$

*Never leave out more than the
original bet at one time!

On the come out roll, when a 2, 3, 11, 12, or 7 is rolled, take all the losing bets first starting w/ the pass/don't pass line.

COLOR CHANGE

When a player requests a color change, wait for the floorperson's instructions to bring in the chips. The floorperson will run down the chips and inform the dealer of the amount. The floorperson will then set out the required denomination of chips if the dealer does not have the required denomination in a working stack. The dealer will set out the correct amount in the case and upon the floorperson's approval, will set off the chips to the player, and call out the total to the player. Floor will not lock up chips until player accepts color.

TOKES

*Hand
\$5 bet
Hand High
\$27 - Green + 2 white*

1. Soliciting tokes is strictly prohibited.
2. Both the bet and payoff on all winning toke bets must be taken down. Toke bets may not be "betted".
3. Color changes for tokes should be made by the dealer with verification by the supervisor.
4. Pay it as you come to it, pick up toke bet after the line is paid.
5. When a player throws in a toke, it must be dropped. If a player gives you the option of picking or dropping a toke, you must drop it into the toke box. Politely explain to the player that once we are given the option to pick or drop the toke, we must drop it.
6. Never drop black chips (\$100's) without the consent of the floor supervisor.
7. It is imperative that all dealers' bets be acknowledged by the floorperson.
8. Maximum toke bet is any amount up to the table maximum.
